During the second half of the 18th century, dark clouds of poverty and disorder were enveloping the old 21 of France. The political, economic and social crises worsened. Complicated depressing social issues came up one after another. All conflicts seemed to culminate in the intense class hatred 22 from inequality between social classes. The French society at that time was divided into three classes. The first two 23 of the clergy and nobility. They were the priests, the King and the aristocrats, 24 for no more than three percent of the total population. All the other people (called the common people), including the rising bourgeoisie, fell into the lowest class. The clergy and the nobility had absolute power and the common people had none. When war debts and cost of government were 25, the burden fell solely on the lowest class. Peasants, at the bottom of the 26, led utterly miserable lives. By contrast, the nobility lived 27 and corrupted lives and showed no mercy at all to the common people. The French Revolution broke out when 97 percent of the population's hatred toward the nobility flared up.

A Tale of Two Cities is set in Paris and London against such a backdrop. French girl Lucie Manette meets and falls in love with a fine Englishman Charles Darnay. He is, however, hiding his true identity as a member of a French aristocratic family, whom he has 28 in private. Darnay's uncle was a cruel man. Those he wronged have vowed to see the end of the family line at any cost. Lucie's father Dr. Manette, in fact, was 29 in the Bastille for 18 years because of the actions of Darnay's uncle. Lucie and Darnay get married. Dr. Manette forgives Darnay. Later Darnay is arrested in France during the Revolution. His aristocratic identity is then discovered. The revolutionaries want to see him die. There is no hope of saving him. The story ends 30 when Sydney Carton decides to replace Darnay to die, in order to fulfill a promise to Lucie whom he loves.

Part III Reading in Depth (20 points, 2 points each)

得分

此部分答案请在答题卡上填涂，写在本试卷上无效。

Directions: There are 2 passages in this part. Each passage is followed by some questions.

For each of them there are four choices marked [A], [B], [C] and [D]. You should decide on the best choice and mark the corresponding letter on the Answer Sheet with a single line through the centre.

Passage One

Questions 31 to 35 are based on the following passage.

Nationwide, only about three percent of early childhood teachers are male in the U.S. Experts say this can have an impact on young children whose understanding of gender roles and identity are rapidly forming. Research has found that having access to diverse teachers is beneficial for children. For the youngest learners, it means they are more likely to get exposed to different varieties of play and communication. It also helps them develop healthy ideas around gender.

"In our world and our society, we have very specific *stereotypes* (模式化形象) of gender roles," said Mindi Reich-Shapiro, an assistant professor in the teacher education department of the Borough of Manhattan Community College, and one of the authors of a recent study. "It's important for children to see other possibilities and other paths they can take."

Despite mostly feeling supported by colleagues and family members, many of the male educators surveyed in the study reported facing social or cultural resistance in their careers as early education teachers. Some also reported that there were parents surprised or concerned that their child had a male teacher. And they had been advised by colleagues or other staff not to hug children.

Reich-Shapiro and fellow researchers made several recommendations to increase male representation in the field. Low pay has long been acknowledged as a major issue in the early childhood field. Over 70% of male educators who said they intended to stay in the early education workforce noted an increased salary was a major motivating factor for them to commit to the career long-term. The report suggests paying all early childhood educators the way elementary school teachers are paid.

Cities and programs should establish support groups for male early childhood educators and provide mentoring and professional development advice for male educators and their program leaders.

The authors also suggest that traditional recruitment approaches for early childhood educators "do not address the gender gap in the field." They recommend providing young men opportunities to work with children through training and volunteer programs, targeting groups of men who are considering a career change, such as fathers.

(352 words)

31. What do we learn from the first paragraph about early childhood education in the U.S.?
- [A] It helps raise children's awareness of gender roles.
 - [B] It exposes children to different ways of interaction.
 - [C] It is negatively impacted by a lack of male teachers.
 - [D] It clearly aims to form children's identity through play.
32. What does Mindi Reich-Shapiro emphasize in her comment on childhood education?
- [A] The importance of broadening children's horizons.
 - [B] The responsibilities of fathers for children's growth.
 - [C] The urgency of creating teacher education programs.
 - [D] The role of teachers in motivating children to learn.
33. What do we learn about male teachers from their responses in the study?
- [A] Some of them find it awkward when hugging children.
 - [B] They feel pressured to keep up with female colleagues.
 - [C] They find it hard to meet the expectations of kids' parents.
 - [D] Many of them feel prejudiced against socially and culturally.
34. What is needed for men to commit to early childhood education?
- [A] Higher pay.
 - [B] Job security.
 - [C] Social recognition.
 - [D] Better working conditions.
35. What do the authors of the study recommend to bridge the gender gap in early childhood education?
- [A] Recruiting young men who have a passion for educating young children.
 - [B] Taking measures to attract prospective male teachers to work in the field.
 - [C] Persuading prospective fathers to consider a change in their career.
 - [D] Providing male teachers with more opportunities for advancement.

Passage Two

Questions 36 to 40 are based on the following passage.

Success was once defined as being able to stay at a company for a long time and move up the corporate ladder. The goal was to reach the top, accumulate wealth and retire to a life of ease. My father is a successful senior executive. In 35 years, he worked for only three companies.

When I started my career, things were already different. If you weren't changing companies every three or four years, you simply weren't getting ahead in your career. But

back then, if you were a consultant or *freelancer* (自由职业者), people would wonder what was wrong with you. They would assume you had problems getting a job.

Today, consulting or freelancing for five businesses at the same time is a badge of honor. It shows how valuable an individual is. Many companies now look to these “ultimate professionals” to solve problems their full-time teams can’t. Or they save money by hiring “*top-tier* (顶尖的) exerts” only for particular projects.

Working at home or in cafes, starting businesses of their own, and even launching business ventures that eventually may fail, all indicate “initiative” “creativity,” and “adaptability,” which are desirable qualities in today’s workplace. Most important, there is a growing recognition that people who balance work and play, and who work at what they are passionate about, are more focused and productive, delivering greater value to their clients.

Who are these people? They are artists, writers, programmers, providers of office services and career advice. What’s needed now is a marketplace platform specifically designed to bring freelancers and clients together. Such platforms then become a place to feature the most experienced, professional, and creative talent. This is where they conduct business, where a sense of community reinforces the culture and values of the *gig economy* (零工经济), and where success is rewarded with good reviews that encourage more business.

Slowly but surely, these platforms create a bridge between traditional enterprises and this emerging economy. Perhaps more important, as the global economy continues to be disrupted by technology and other massive change, the gig economy will itself become an engine of economic and social transformation.

(366 words)

36. What does the author use the example of his father to illustrate?

- [A] How long people took to reach the top of their career.
- [B] How people accumulated wealth in his father’s time.
- [C] How people viewed success in his father’s time.
- [D] How long people usually stayed in a company.

37. Why did people often change jobs when the author started his career?

- [A] It was considered a fashion at that time.
- [B] It was a way to advance in their career.
- [C] It was a response to the changing job market.
- [D] It was difficult to keep a job for long.

38. What does the author say about people now working for several businesses at the same

time?

- [A] They are often regarded as most treasured talents.
- [B] They are able to bring their potential into fuller play.
- [C] They have control over their life and work schedules.
- [D] They feel proud of being outstanding problem solvers.

39. What have businesses come to recognize now?

- [A] Who is capable of solving problems with ease.
- [B] How people can be more focused and productive.
- [C] What kind of people can contribute more to them.
- [D] Why some people are passionate about work.

40. What does the author say about the gig economy?

- [A] It may force companies to reform their business practice.
- [B] It may soon replace the traditional economic model.
- [C] It will drive technological progress on a global scale.
- [D] It will bring about radical economic and social changes.

Part V Passage Translation (15 points)

得分	
----	--

翻译答案请写在答题纸上，写在本试卷上无效。

Directions: For this part, you are allowed 20 minutes to translate the following passage from English into Chinese.

Things are as they are simply because that is the way they are. The inherent principle of order, common to all that exists, is called the Way (*dao*). The Way is not some sort of law or pattern that any higher power imposed on what exists. And since the Way is not so foreign to everyday human reality as to be past man's finding it out, it was never necessary for the Way to be revealed by prophets. The Way reveals itself in the ongoing process of historical existence, and human beings who apply themselves to discovering the pattern or recurrent regularities in that process are perfectly able to do so.

Part VI Writing (15 points)
